## Printing behaviour

- It can be applied on all types of paper and cardboard and on certain corona treated plastic substrates. It is recommended to always test for adhesion before printing
- Medium viscosity (55-65 seconds at 21°C).
- This varnish is not suitable for food applications unless an appropriate risk analysis demonstrates that its use is safe.
- Ready for print at optimum viscosity.
- Formulated without benzophenone.
- High gloss varnish.
- Excellent rub resistance.
- Fast drying.

## Recommendations

- Pre-testing is always recommended.
- UV varnishes should be kept in stock at temperatures between 15 - 25°C and should not be exposed to direct sunlight. If possible, store the varnish in a dark room.
- **Shelf life:** 12 months from date of manufacture.
- Shake well before use.
